

1

Download the Kubu app from the App Store or Google Play and create your account.

2

Add your door sensor by pressing the + button on the home page of the App.

3

Make sure your door is open with hooks and bolts thrown. Do this by lifting the handle with the door in the open position.

4

Remove the cover cap, using the screwdriver provided.

Place the batteries in the new module.

Push the new module in the door and then turn the locking pin clockwise to lock in place.

5

Scan the door module QR code using the Kubu App. Name your door.

6

Wait for your hub to stop flashing and become a static blue colour.

Lock / Unlock your door and continue to the home page to start enjoying the benefits of Kubu Smart Security!
